What is **ROBLOX**

Roblox is an online game platform and game creation system developed by Roblox Corporation. It allows users to program games and play games created by other users.

Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company, due to both co-founder Baszucki's lack of interest in press coverage and it being "lost among the crowd" in a large number of platforms released around the same time. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic

That's all folks!
